

Web Apps Assessment Test

Introduction

Hello, thanks for opening this document, in this document, you will see 3 Level. Which is the minimum requirement is on Level 1, and also 2 Level that you **should, not must** to be done.

Level 1

Severity: High

In this task, you have to find out about something described below, because you will need this in the future:

1. Web Service and how it works.
 2. REST API and why should use it, who use it.
 3. RDBMS vs NoSQL, how they works.
 4. PHP vs Go vs Ruby vs Node JS; which one you love, **explain in your language**.
-

Level 2

Severity: Low-Medium

This task is specified only for people that having energetic brain, with the dictionary from **Task 1**, design a systems to make a "**To Do List**", it should run on multiple platform, and consider about the traffic.

Level 3

Severity: Low

This task is very optional, and the task is make a prototype for Level 2, using tech stack you've choose on Level 1 and using your design on Level 2.
